NPK

WATER SOLUBLE NPK
The most widely used
fertilizer in agriculture.

RANGE IDROACTIVE High-yield water-soluble

Growth NPK 20-20-20+TE
Develop NPK 12-8-24+1MgO+TE
Energy 30-10-10+0,5MgO+TE
Extraphos NPK 12-36-6+1MgO+TE
Yield 25-5-10+1MgO+TE

RANGE COYDROS Hydrophilic organic complex based on polypeptides, PGA, and algal substances

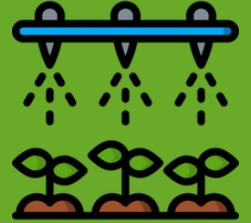

Equo NPK 18-18-18 + TE + PGA
Isoro NPK 15-15-25 + TE + PGA
Orima NPK 8-15-10 + TE + PGA
Riza 15-40-8 + TE + PGA

NPK

WATER SOLUBLE NPK
The most widely used
fertilizer in agriculture.

WATER SOLUBLE COYDROS E IDROACTIVE

The pH does not exceed 3, making our products absorbable even in the presence of saline water.

RANGE COYDROS

Low pH:
Buffering activity in the solution.

Synergizing:
The Coydros complex in solution creates a protective film that promotes the exchange between the rhizosphere and the root.

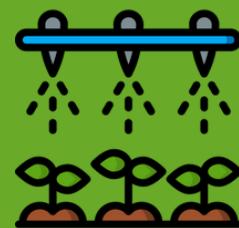

Biostimulant:
PGA and algal substances promote growth, increase photosynthetic activity, and act as an anti-stress agent.
